# **Water Chiller**

# TT-216'000

Air cooled water chiller for individual machines or multi-machine applications

For water temperatures from +10°C up to +40°C, at ambient temperatures up to +45°C

Suitable for high ambient air and tropical installations

No unnecessary water consumption due to a closed water circuit

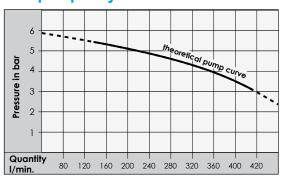

#### **Operating principle**

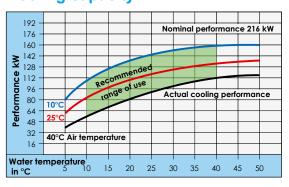

Two-pump system. One pump for internal circuitand on for the external circuit to the consumer. Possible to connect up to three units to one or individual tanks. Connection to free cooling system possible. The unit is equipped with a corrosion free water tank with a content of approx. 600 litres. Once the water has cooled down to the required temperature, the compressor cuts out. It switches on again after the temperature has increased.

- Self-optimizing microprocessor controller with digital display of the set and actual temperature. With high precision regulation in <sup>1</sup>/<sub>10</sub>° range; can be adjusted to read °C or °F.
- All components in contact with water are made of corrosion resistant stainless steel.
- Long life expectancy due to the electronic control of the compressors operating time.
- Automatic or manual water refill.
- Automatic level control with prewarning at low water level.
- · Horn in case of failure.
- · All failures are visually indicated.

## **Pump capacity**

#### **Technical data**

Temperature control self-optimizing, electronic microprocessor controller MP-888 with

digital display of the set and actual value.

Automatic temperature monitoring.

Cooling capacity

Nominal 216 kW - see diagram

Temperature range

Circulating water +10°C up to +40°C Air temperature +2°C up to +45°C

Content water tank approx. 600 l

Refrigerating agent R-134a

**Pump capacity** 

External circuit at 200 l/min 5 bar; at 400 l/min 3,5 bar

Internal circuit approx. 500 l/min

**Compressor** hermetically sealed

**Condenser** air cooled, air inlet located on the side, blow out located on the top

Air volume 4 x 8'000 m<sup>3</sup>/h (not relevant to WK)

Power consumption approx. 66 kW

**Connections** 

To / from mould 2" BSP female thread Automatic water refill 3%" BSP female thread 1" BSP female thread

Cooling water in/out 2" BSP female thread (only at WK)

Dimensions (LxWxH) 3'350 x 1'300 x 2'090 mm, incl. feets

Noise level (in 3 m distance) 70 dBA

Weight 2'040 kg empty

Colour silvergrey RAL 7001

#### TT-216'000 WK:

The same model is also available as water cooled version.

Required cooling water: minimum 1,5 bar water pressure.

With cooling tower water (approx. 30°C) approx. 260 l/min cooling water consumption with tap water (approx. 10 - 15°C) approx. 100 - 150 l/min cooling water consumption

### **Electronic temperature controller MP-888**

The electronic controller can be adjusted to indicate °C or °F. The upper turning on point and lower turning off point (hysteresis) of the temperature band can be adapted. Due to this, the time range between the start and stop point of the compressor is wider and the compressor has a longer life expectancy.

Set temperature / required temperature Adjustable in  $^{1}/_{10}^{\circ}$  range

Actual temperature (effective temperature) displayed in <sup>1</sup>/<sub>10</sub>° range
